bad-example-plumbing.test

October 16, 2026

F
56/100

We found 19 things to improve: 4 to fix first, 8 to fix soon, 7 to consider.

We checked 3 pages of bad-example-plumbing.test on October 16, 2026, ran Google Lighthouse on 2 of them as a phone on a 4G connection, and tested 4 links and images.

Speed	100	Good
Phones	28	Poor
Google search	51	Needs work
Accessibility	80	Needs work
Trust & contact	22	Poor

Fix first 4

These cost you visitors, calls or Google rankings right now.

FIX FIRST · PHONES

1 page isn't set up for phones

Without a viewport tag, phones show a shrunken desktop page that visitors have to pinch and zoom to read.

How to fix Add <meta name="viewport" content="width=device-width, initial-scale=1"> to the <head> of every page.

Where `/about.html`

FIX FIRST · PHONES

1 page is wider than a phone screen

Depending on the phone, the page wobbles sideways as visitors scroll, opens zoomed out with tiny text, or cuts off whatever sticks out past the right edge. Each one looks broken.

How to fix Let the wide element fit: max-width: 100% on images, tables and embeds, allow long words, emails and links to wrap, and check which header or menu shows at phone widths.

Where `/`

On the homepage, at 390px wide, the page is 628px:

- div.promo ("This promo banner is wider than a phone") reaches 628px

FIX FIRST · GOOGLE SEARCH

Google is told not to list 1 page

These pages carry a "noindex" tag or header, so they won't appear in Google at all.

How to fix Remove noindex from every page you want people to find. It's often left over from building the site.

Where `/contact.html`

FIX FIRST · TRUST & CONTACT

1 link on the site leads to a missing page

Visitors who hit an error page often give up, and Google sees it as a sign the site isn't kept up.

How to fix Point each link at the right page, or redirect the old address to its replacement.

Where `/`

- bad-example-plumbing.test/missing.html (error 404), on /

Fix soon 8

Worth fixing in the next round of updates.

FIX SOON · PHONES

The phone number isn't tap-to-call

On a phone, people expect to tap a number to call it. Making them copy it by hand loses calls.

How to fix Wrap the number in a call link, e.g. (555) 123-4567.

Where `/` `/about.html`

- Number found: (555) 010-2030

FIX SOON · GOOGLE SEARCH

2 pages share the same title

Each page's title is its headline in Google. Identical titles make pages compete with each other, and Google may show the wrong one.

How to fix Write a different title for each page that says what that page is about.

Where `/` `/about.html`

- "Home" on 2 pages

FIX SOON · GOOGLE SEARCH

1 page has no search description

The description is the text under your title in Google. Without one, Google picks a random snippet from the page, which often reads poorly and gets fewer clicks.

How to fix Write a 120–160 character description for each page that says what you offer and where.

Where `/about.html`

FIX SOON · GOOGLE SEARCH

Google doesn't get your business details in a form it can read

Structured data (LocalBusiness) gives Google your name, address, phone and hours exactly. It helps local searches and Google Maps match the site to your business.

How to fix Add LocalBusiness JSON-LD to the homepage with your name, address, phone, opening hours and website, matching your Google Business Profile.

Where `/`

FIX SOON · ACCESSIBILITY

1 image has no description (alt text)

Blind visitors hear nothing (or a file name) where the image is, and Google can't tell what the photo shows, so it won't appear in image search.

How to fix Describe each meaningful image in its alt attribute, such as alt="Technician fixing a water heater". Decorative images get alt="".

Where `/`

- photo.svg

FIX SOON · TRUST & CONTACT

1 link to other websites is broken

Dead links (often old social profiles, directories or partners) make the site look neglected.

How to fix Update each link to the current address or remove it.

Where `/`

- nonexistent-site.invalid (ENOTFOUND), on /

FIX SOON · TRUST & CONTACT

1 image doesn't load

Visitors see an empty box or a broken-image icon instead of your photo.

How to fix Re-upload the missing images or fix their addresses.

Where `/`

- bad-example-plumbing.test/img/nope.jpg (error 404), on /

FIX SOON · TRUST & CONTACT

A form opens the visitor's email app instead of sending

Many people have no email app set up on their computer, so the message never sends and you never see the lead.

How to fix Send the form through a form service (such as Formspree or Netlify Forms) or the site's own backend.

Where `/contact.html`

Nice to have 7

Small polish that adds up.

NICE TO HAVE · GOOGLE SEARCH

1 page has more than one main heading

Several H1s blur what the page is mainly about for Google and screen readers.

How to fix Keep one H1 per page and make the others H2s (the look can stay the same).

Where `/`

- /: "Bad Example Plumbing", "Call today"

NICE TO HAVE · GOOGLE SEARCH

Links to the site show no preview picture when shared

When someone shares the site on Facebook, Messenger or Viber, a link with a picture gets far more attention than a bare one.

How to fix Add an og:image tag pointing to a 1200×630 image, using its full https:// address.

Where `/`

NICE TO HAVE · ACCESSIBILITY

The page language isn't set

Screen readers may read the text with the wrong accent and pronunciation.

How to fix Add the language to the <html> tag, e.g. <html lang="en">.

Where `/` `/about.html` `/contact.html`

NICE TO HAVE · ACCESSIBILITY

Lighthouse found other accessibility problems

These are technical problems in the page code that make the site harder to use with a screen reader or keyboard.

How to fix A developer can open the Lighthouse report for these pages (Chrome DevTools, Lighthouse tab) to see each problem and where it is.

Where `/` `/contact.html`

- Document does not have a main landmark.

NICE TO HAVE · TRUST & CONTACT

The footer says © 2019

An old year makes visitors wonder whether the business is still open and the information still current.

How to fix Update the year, or have the site fill in the current year automatically.

Where `/` `/about.html` `/contact.html`

NICE TO HAVE · TRUST & CONTACT

No icon in the browser tab

The small icon in tabs, bookmarks and Google's mobile results makes the site look finished and easy to spot.

How to fix Add a favicon (your logo mark) with <link rel="icon" href="/favicon.png">.

Where `/`

NICE TO HAVE · TRUST & CONTACT

The site has script errors

Errors can quietly break buttons, forms, maps or tracking without anyone noticing.

How to fix Open the browser console on the pages listed and fix or remove the scripts that fail.

Where `/`

What's already working

These checks passed. Keep them that way when the site changes.

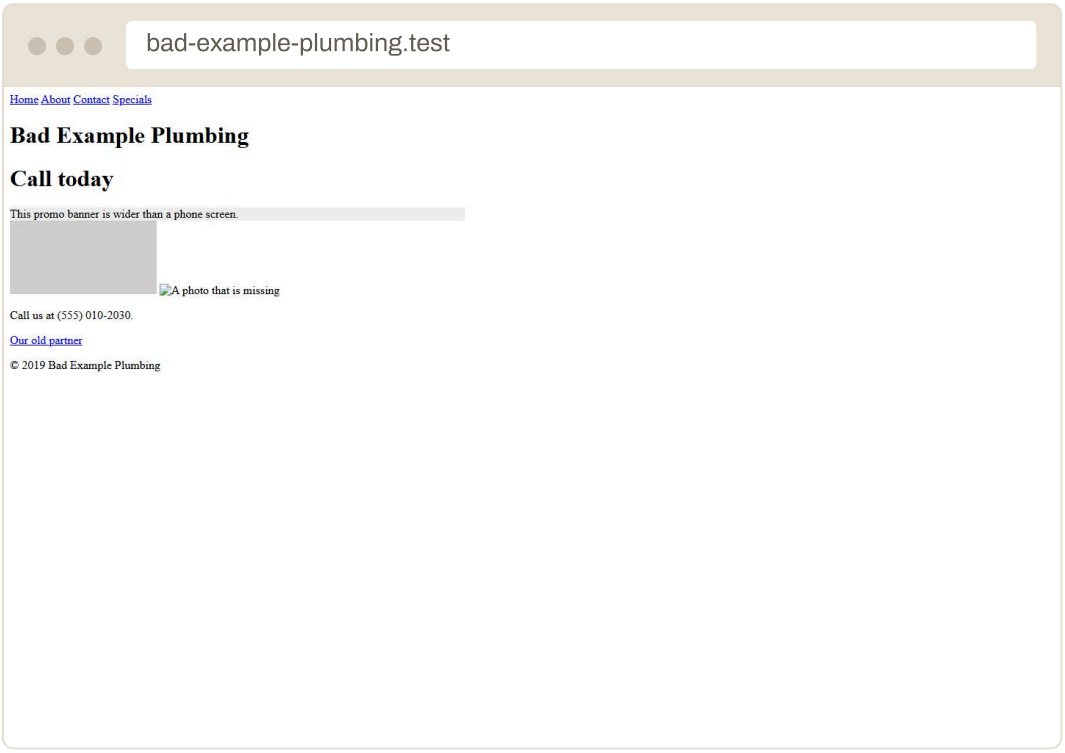

SPEED

- The main content appears in 0.9 s on a phone (Google's target: under 2.5 s).
- The layout stays put while the page loads.
- The homepage is a light 1 KB download.

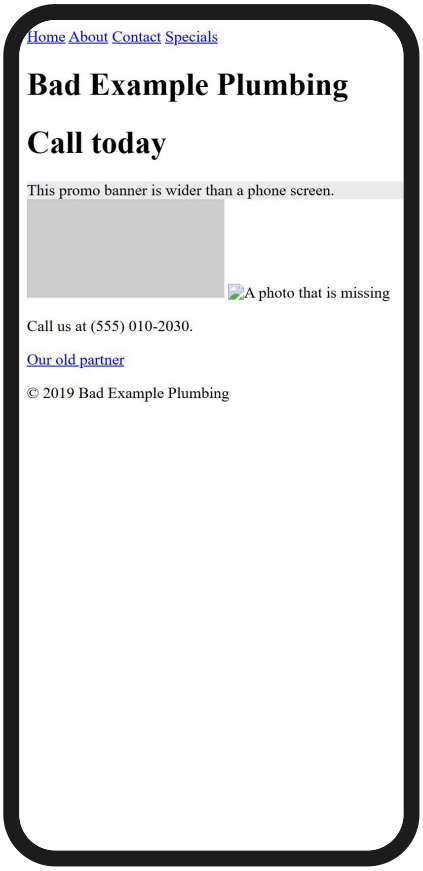

TRUST & CONTACT

- Visitors can reach the business by phone, email or a form.

How the homepage looks today

Desktop, 1440 px wide

Phone, 390 px wide

Google Lighthouse, on a phone

Lighthouse is Google's own testing tool. Scores run from 0 to 100; 90 and up is good. It simulates a mid-range phone on a slow 4G connection, so real visitors on Wi-Fi will usually see faster loads.

PAGE	PERFORMANCE	ACCESSIBILITY	BEST PRACTICES	SEO	MAIN CONTENT SHOWN	LAYOUT SHIFT	FROZEN
`/`	100	72	96	91	0.9 s	0.00	0 ms
`/contact.html`	100	88	100	60	0.6 s	0.00	0 ms

Google's targets: main content shown in under 2.5 s, layout shift under 0.1, and the page frozen for under 200 ms.

What we checked

We checked 3 pages of bad-example-plumbing.test on October 16, 2026, ran Google Lighthouse on 2 of them as a phone on a 4G connection, and tested 4 links and images.

`/` Home

`/about.html` Home

`/contact.html` Contact Bad Example Plumbing

1 page couldn't be loaded and is counted in the broken links above.

Want these fixed?

I design and fix websites for small businesses so they load fast, work on every phone and get found on Google. Reply to this report and I'll tell you what it would take to fix everything above.
